Dear Sir:

We are pleased to enclose our new Model 110 brochure which completely describes this advanced high performance portable instrumentation magnetic tape recorder. This is one of the most versatile truly portable data recorders available, ideally suited to a broad range of field, mobile, and airborne data acquisition applications.

Why don't you send us details on your application, including number of channels, input power, speeds, and desired frequency response so we can quote on your specific requirements? We think you'll be pleasantly surprised at the modest price performance ratio of this versatile recorder.

Very truly yours,

PACIFIC ELECTRO MAGNETICS CO., INC.
